SECTION 3 - DESCRIPTION OF SERVICE, (CONT'D.)

3.3 Calculation of Distance

Usage charges for all mileage sensitive products are based on the airline distance between serving wire centers associated with the originating and terminating points of the call. The serving wire centers of a call are determined by the area codes and exchanges of the origination and destination points.

The distance between the Wire Center of the Customer's equipment and that of the destination point is calculated by using the "V" and "H" coordinates found in BellCore's V&H Tape and NECA FCC Tariff No. 4.

- Step 1: Obtain the "V" and "H" coordinates for the Wire Centers serving the Customer and the destination point.
- Step 2: Obtain the difference between the "V" coordinates of each of the Wire Centers. Obtain the Difference between the "H" coordinates.
- Step 3: Square the differences obtained in Step 2.
- Step 4: Add the squares of the "V" difference and "H" difference obtained in Step 3.
- Step 5: Divide the sum of the square obtained in Step 4 by ten (10). Round to the next higher whole number if any fraction results from the division.
- Step 6: Obtain the square root of the whole number obtained in Step 5. Round to the next higher whole number if any fraction is obtained. This is the distance between the Wire Centers.

Formula:

$$\sqrt{\frac{(V_1 - V_2)^2 + (H_1 - H_2)^2}{10}}$$

4.6 Debit Card Calling Service

(T)

Debit Card Calling Service is a pre-paid long distance calling card service. Customers purchase calling cards from distribution outlets in pre-determined amounts for long distance usage. The service is accessed through a toll-free number. To complete a call the caller enters their special Authorization Code and then dials the destination number. Before the call is placed the user is informed of the Available Usage Balance.

As users access the service, the usage is automatically deducted from the Available Usage Balance. Before the Available Usage Balance reaches zero, the caller is notified in sufficient time to end the call. When the Available Usage Balance reaches zero, the user may purchase another debit card or purchase additional funds via a major credit card in order to continue to access the service.

Calls are billed in full minute increments. The Company shall assure customers are not charged for calls that are not completed within 90 seconds of the customer receiving a busy or ringback signal.

(T)

Card may be configured in dollars, minutes or units.

The Company is not responsible for lost or stolen cards.
